DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 to 3 and 5 are rejected under 35 U.S.C. 102(a) as being anticipated by Spies DE10202371 (English translation attached. Filed Jan 23, 2002 and published Aug. 7, 2003.).

Spies teaches a vehicle door handle device comprising:

an electric part having a first and a second face (by reference number 37 and 27, respectively);

a gap (space within the door handle);

a first elastic member 30 mounted on the second face of the electric part, and disposed within the gap to be pressed against the inner surface of the door handle 37 and the second face of the electric part;

a second elastic member 24 attached to an edge of the electric part (the projection is attached to the electric part);

a projection 12 on the inner surface of the door handle, projecting to the second elastic member; and

wherein the second elastic member is pressed against the inner surface of the door handle through the projection.

Regarding claim 3, the door handle of Spies includes a handle body 10 and a cover 37, and the body 10 has a reinforcing portion (starting from reference number 15 and continues to 16) formed along the electric part (to hold and reinforce the electric part).

Regarding claim 5, the electric part includes a first electric part (the top contact) and a second electric part (the bottom contact) having signal wires 40 fixed to the first electric part, where the signal wires are flexible.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Spies.

Spies teaches the claimed invention including the handle cover having a retaining groove (by the reference number 16) and the reinforcing portion having a retaining claw to allow the handle body and the handle cover fixed together. It would have been obvious to one of ordinary skill in the art at the time of the invention to have interchangeably alter the claw and the retaining configuration to the either reinforcing portion or the cover, since the purpose of either would to fix the cover to the body of the handle.

Response to Arguments

3. Applicant's arguments with respect to claims 1 to 3 and 5 have been considered but are moot in view of the new ground(s) of rejection.
4. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to K. Richard Lee whose telephone number is (571)272-1994. The examiner can normally be reached on M and W-F from 5:30 AM to 4:00 PM.
